Hospital Equipment
Corporate Profile

Trulife is a pre-eminent global manufacturer of orthopaedic & physical rehabilitation products for orthopaedic, podiatric, orthotic and therapy professionals.

The core philosophy is a belief in serving customer's needs through excellence in product innovation, quality in everything we do, offering extensive education & training and developing patient care through committed and dedicated people.

This catalogue brings together the Trulife range with the former Progressive Surgical Ltd. product portfolios and offers a comprehensive range of innovative products designed & developed to cater for an evolving market and built on years of experience in the Operating Theatre, Sterile Services and Critical Care environments.

Trulife has a fully equipped workshop with trained personnel to service all products sold by the company. Minor repairs are carried out on-site to ensure a speedy and efficient service with minimum disruption to the hospital. We offer a range of service contract options to suit your requirements including servicing of hospital beds, patient trolleys and operating tables.

Universal Warming Cabinets

The Kanmed Universal Warming Cabinet is designed to assist in the reduction of patient hypothermia and to increase the patient comfort. The Cabinet is mainly used in the operating theatre area for warming intravenous fluids, dialysis & irrigation fluids, Trulife Gel Pads and other gel positioning equipment.

*Compared to less insulated cabinets, Kanmed Cabinets may save you more than Euro 350 per year in electricity consumption.

The Kanmed BabyBed
The Kanmed BabyBed provides the best care for premature and newborn babies in medium and low intensive care situations. The cosy BabyBed is developed together with neonatal nurses to guarantee a high level of ergonomics. The height of the BabyBed can be electrically adjusted and the see-through side walls are designed to fold for easy access to the baby.

- Universal size tube holder reducing amount of accessories required in the bed for ventilated babies.
- A tent protects against light, visual stimulation and cold air.
- Tilt function and foldable sides.
- An adjustable soft Baby Nest creates a feeling of protection.
- A very soft warm Water Mattress that is kept at about 37°C.
- A low voltage and safe Heating Pad that is watertight.
- A very user friendly Control Unit with alarms.
- Electrically adjustable height.
- Lockable wheels for stability.

Includes: Manual height setting, not to be adjusted daily. Mattress, Tent, Tent Pole, Shelf, Power Cable for Kanmed Baby Warmer, 19 cm side walls, also available with 24 cm side walls.

Kanmed BabyWarmer
The Kanmed BabyWarmer is a very soft Water Mattress that replicates the mother’s skin at 37°C and is based on the philosophy of Kangaroo Mother Care. The baby is covered depending on its needs and surrounding temperature. The optimal warming ensures growth rates in gram/day that are equal to or better than that of the best incubators.

- Maximum Patient Weight: 250kg
QA3 Variable Height Patient Trolley

The QA3 version 3.0 Variable Height Patient Trolley: ideal for patient transport, examination and intubation in theatre and clinical areas. Designed for maximum patient comfort, the trolley is supremely manoeuvrable, compact, light weight and robust.

- Hydraulic lift mechanism – exceptional low height capability
- Vertically operated cotsides – giving a virtually zero transfer gap
- Trendelenburg tilt – extremely smooth and controlled mechanism
- Latest castor technology – low rolling resistance for high manoeuvrability
- 5th wheel steering – easily guided by one person
- Pushing handles – ergonomically positioned
- Gas assisted back lift – horizontal to near vertical
- Advanced braking system – exceptionally stable platform
- Fixed transfusion pole – innovative quick release
- Cylinder trough – side loading
- K8 pressure care mattress
- Patient utility trays
- Rotating buffers – at head and foot ends
- Infection control – anti-bacterial properties and smooth moulded surfaces

Dimensions

Overall Length 2130mm
Overall Width 735mm
Height range (Non X-ray) (Excluding mattress) 475 to 775mm
Weight 118kg
Maximum patient weight 250kg
(Please refer to user manual)

Model No. Item
21110 QA3 Variable Height Patient Trolley (Non X-ray) c/w K8 Pressure Care Mattress

Optional Extras

21132* 200mm castor option
21135* Reverse Trendelenburg
21145 Complete emergency Venturi suction system
21150 Foot end stop/monitor shelf
21155* Fixed pushing handles foot end
21160 Spare transfusion pole removable
21161* Spare transfusion pole fixed
21172 Grey cotside covers
21173 Child print cotside covers
21175* Department identification
21185 K8 pressure care mattress

*Denotes factory fitted option – please specify at the time of ordering
QA3 Variable Height Patient Trolley, X-Ray

A specially designed version of the QA3 for radiography in theatre and emergency departments. As standard, this version of the QA3 is equipped with a raised X-ray translucent platform which allows for the manoeuvring of X-ray cassettes along the channel.

- Hydraulic lift mechanism – exceptional low height capability
- Vertically operated cotsides – giving a virtually zero transfer gap
- Trendelenburg tilt – extremely smooth and controlled mechanism
- Latest castor technology – low rolling resistance for high manoeuvrability
- 5th wheel steering – easily guided by one person
- Pushing handles – ergonomically positioned
- Gas assisted backlift – horizontal to near vertical
- Advanced braking system – exceptionally stable platform
- Cylinder trough – side loading
- K8 pressure care mattress
- Patient utility trays
- Rotating buffers – at head and foot ends
- Infection control – anti-bacterial properties and smooth moulded surfaces

Scandia Lojer Operating Table

Scandia is a modern electrohydraulic operating table with the highest functionality and versatility for universal surgical procedures. Scandia provides you with an easy-to-use, cost efficient operating room solution with a long lifetime.

### Dimensions and Weight
- Overall length with head plate 2070 mm
- Width 550 mm (615 mm over the siderails)
- Patient weight capacity (SWL) – 350/280/250 kg
- Castors (double structure) Ø 125 mm
- Floor clearance 20/80 mm
- Primary voltage 230 V

### Adjustment Ranges
- Height (without mattresses) 650 - 1010 mm
- Trendelenburg / Reverse trendelenburg 30°/ 30°(or 35°/ 25°)
- Lateral tilt (right/left) 17°/ 17°
- Back section (up/down) 70°/ 35°
- Leg section (up/down) 90°/ 90°

The Scandia Operating Table 330 complies with the following standards: IEC 60601-1, IEC 60601-2-46 and IEC 60601-1-2. CE

Orthopaedic Surgery: The orthopaedic attachment is mounted directly to tabletop and follows all its movements. The telescopic beams provide good stability. Abduction and adduction is controlled from the distal side of the attachment and well outside the sterile field.

Lojer Capre RC Multi-Function Chair
The luxury Capre RC chair has been developed together with healthcare professionals to meet the demands of modern treatment processes. Examples of use include dialysis and cytostatic treatment, as well as recovery after outpatient operations. The Capre chair offers a pleasant alternative to a hospital bed, because its five motors and intelligent control system allow it to be adjusted to the optimal position for each patient’s treatment and comfort. The control panel allows adjustment of the chair’s height, back section, seating angle and both leg sections, independently of one another. The leg sections also feature length adjustment. The chair features three pre-programmed positions as well as two memory spaces for the customer to program and store their own positions. The patient’s comfort is further enhanced by the body heat responsive, anatomic SKAI Lux upholstery, an iPad stand and charger option as well as a coffee tray. If necessary, the chair can also be adjusted to horizontal position.

For further information please contact your local Trulife sales representative.
Allen® Spine System

The Allen Spine System is an extension for your OR table that enables you to perform spine surgery with the positioning benefits of a Jackson table! In addition it offers intraoperative lumbar flex and a small storage footprint. The advanced accessories adjust to fit the individual patient’s anatomy.

- Intraoperative Flex – use the power of the table to flex and reposition the patient
- Radiolucent Extension 48” x 17” (1220 mm x 430 mm) – provides excellent C-Arm and O-Arm access
- Saves Space – stores in 3’ x 3’ area (1 sq. m) and accessories can be stored on the frame
- Optimized pressure management - chest, hip, and head supports
- Versatile – prone, lateral, and supine positioning
- Range of Motion – provides 20° lateral tilt, trend and flex powered by the OR table
- Height – 25” to 38” (635 mm - 965 mm)
- Fits OR tables with outside rail width 20” - 24” (510 mm - 610 mm)
- Patient weight capacity: 500 lbs. (227 kg)

[Trulife Logo]
C-Flex® AP-Vantage System
The unique product design eliminates obstructions, leaving nothing but the patient in the shot. C-Flex AP-Vantage System provides the cleanest possible cervical images on an OR table. Attach C-Flex System to any surgical table.

The system can be used for both anterior and posterior cervical surgeries, it includes an OR table adaptor (with carbon fiber rails) and the C-Flex head positioner. All the benefits of the C-Flex system for the OR table with a variety of different head attachments.

Ideal for use with Odontoid Screws, Cervical Fusion, and Artificial Cervical Discs.

- Artifact-Free Imaging
- Squeeze & Position with C-Flex
- Easy Precision Adjustments Intraoperatively
- Added Stability with Optional Leg
- Device Weight = 20 lbs (9 kg)
- Works with the Mayfield Skull Clamp and Mayfield Horseshoe
- Fits OR Tables with Outside Rail Width 20” - 251/2” (508 mm - 648 mm)
- Fits Any Accessory Rail Type (US, EU, UK, Denyer, and Japanese)
- Patient Weight Capacity: 500 lbs (227 kg)

Allen® Bow® Frame

The Allen Bow Frame is a platform used to perform less complex spinal surgeries. The Bow Frame is more versatile than the existing Wilson™ Frame as the single device attaches to standard OR tables, the Jackson Table and Allen Frame. Its shape creates the desired reverse lordosis needed to open the intervertebral spaces. The Bow Frame enables the patient’s abdomen to hang free during procedures. It is also radiolucent and allows for unrestricted C-arm access. The removable crank is used to adjust the amount of flex and tension in the patient supports.

- Fits OR tables
- Radiolucent
- Device weight: 25 lbs (11.3 kg)
- Patient supports are adjustable to fit patients of various sizes
- Patient supports adjust laterally up to 10 inches (25.4 cm) to relieve pressure on the patient’s abdomen
- Patient weight capacity: 500 lbs (227 kg)
- Lightweight for easy set-up
- Compact for easy storage
- Storage cart included for easy transport
- Skin Care Cover disposables are comprised of cosmetic foam, designed to protect skin from friction and shear

Ideal for use with:
- Laminectomy
- Microdisc procedures
- Disc procedures
- Fusion procedures
- Decompressions
- Foraminotomy

Bow® Frame Cart

The Bow Frame Cart stores all of the accessories used with the frame, including the head positioner and arm supports. The Bow Frame stores securely in the deep bin of the cart. The cart’s weighted base makes it tip-resistant and reduces potential vibration during transport. The polymer base is dent-resistant and the heavy-duty casters roll smoothly. Two casters lock for safer and easier loading, unloading, and storage.

Lift-Assist® Beach Chair
Make Positioning Easy. Use Lift-Assist One-Handed Positioning

The Lift-Assist Beach Chair is designed for use with orthopaedic procedures using the Fowler’s or beach chair position. The chair offers unobstructed access, and the Lift-Assist mechanism makes repositioning the patient quick and easy. The Lateral Slide feature enables the surgeon to move the patient closer to the edge of the OR table, for increased surgical site access. The Lift-Assist Beach Chair weighs under 30 lbs (13.6 kg) without the back support panels installed.

### Sliding Head Positioners

All of the Allen Beach Chairs feature free sliding head positioners to protect the patient’s neck when raising and lowering the table. Fold-away shoulder wings remove completely for unobstructed shear-free access to the operative shoulder.

**Table-Powered** - On powered OR tables, the Table-Powered Beach Chair utilizes the table’s foot section to raise and lower the patient.

**Lift-Assist** - On non-powered OR tables, the Lift-Assist Beach Chair reduces the effort required to raise and lower the patient.
Allen® Arm Positioner  
Ideal for use with all Open and Arthroscopic Upper Limb Procedures

The Allen Arm Positioner delivers effortless arm positioning for shoulder surgery in the Beach Chair position, as well as elbow and clavicle procedures. By indexing at the elbow, the device is able to gain complete positioning control of the shoulder joint. The revolutionary patent pending design allows the entire device to be steam sterilised and provides an unprecedented level of access to the surgical site. The device also has the capability of achieving a semi-locked state, allowing the surgeon to simply move the arm where he wants it without having to adjust the tension.

- Effortless, fluid positioning for enhanced site access
- Connects over the drape, in the sterile field
- Compact and portable for easy storage
- Single knob releases all joints
- Index at the elbow for complete control
- The only fully autoclavable arm positioner on the market
- Quick and easy setup
- Unlimited access to the surgical site (no bars or foot pedal obstructions)
- No Foot Pedal / No Hoses / No Hydraulics / No Power Cords
- Lightweight, device weighs only 6 lbs. (2.7 kg). No cart required
- Patient Weight Capacity: 500 lbs. (227 kg)

### Lateral Braces

Extended posts adjust for use on patients from pediatric to bariatric and stabilises on OR tables. Suitable for total hip and other procedures requiring optimum lateral stability.

- Braces are fully adjustable.
- Soft pads provide soft cushioning of bony prominences.
- Swivel heads conform to anatomical contours of patient and can be securely locked for precise positioning.

Total Knee Stabilizer
A convenient, stable device to support the flexed leg during total knee procedures. Eliminates awkward sandbags, and simply mounts to the table rail. The 10" long by 2" diameter (25.5 cm x 5 cm) foot support is covered with a soft, replaceable closed-cell foam pad. The 13" (33 cm) long mounting bar permits vertical height adjustment while the flat 1/4" x 1" (0.6 cm x 2.5 cm) cross section prevents unwanted rotation.

PAL Pro® Stirrups
The Power of Safety and Control at Your Fingertips
The PAL Pro Stirrup is the highest level stirrup utilising a standard boot. The stirrup allows for easy adjustment of abduction and lithotomy while maintaining the sterile field. The PAL Pro is differentiated from the Yellofin Stirrup by boot design, optional integrated clamps, mechanism cover, the type of hand control and lithotomy indicator.
- Floating Boot – Self adjusting standard boot minimizes pressure on the calf, when moving the stirrup
- Lift-Assist – Allows easy movement of the leg when placing it in the desired position
- Handle – Provides easy intraoperative adjustment without compromising the sterile field. Simply release the handle to secure the leg holder in all directions
- Lithotomy range – Set the stirrup in any position between +90° to –22° lithotomy
- Abduction Range – Set the stirrup in any position between +25° to –9° abduction
- Lithotomy & Length Indicators – Visual indicators help ensure precise positioning
- Mechanism Cover – Easier to clean the stirrup between cases
- Optional Integrated Clamp – No risk of losing clamps
- No Foot Pedal / No Hoses / No Hydraulics / No Power Cords
- Lightweight, device weighs only 6 lbs. (2.7 kg). No cart required!
- Patient Weight Capacity: 350 lbs. (159 kg)
Note: stirrups are sold in pairs.

Junior PAL™ & Little PAL™ Pediatric Stirrups
Effective, Natural Design Fits Pediatric Anatomy
Easy to use, comfortable, and secure leg positioning for pediatric patients of all ages. Simultaneous abduction and lithotomy adjustments are easily made via a single handle, while maintaining the sterile field. Boot is adjusted with a single clamp, making positioning simple. Attaches to the rail of any OR table.
- Pediatric Boot Design – Special boot design to fit pediatric anatomy, and cradling the pediatric calf, ankle, and heel in a natural position
- Floating Boot – Self adjusting standard boot minimizes pressure on the calf, when moving the stirrup
- Reusable Clamshell Pad – Completely encapsulates the foot, ankle, and calf to protect, cushion, and reduce pressure on these areas
- Visual Indicators – Help to ensure precise positioning
- Lithotomy Range – Set the stirrup in any position between +90° to –35° lithotomy
- Abduction Range – Set the stirrup in any position between +25° to –9° abduction

**Yellofins® Stirrups**

**Simultaneous Lithotomy and Abduction**

The Yellofin Stirrup represents the gold standard in lithotomy positioning. Yellofin Stirrups allow for easy adjustment of abduction and lithotomy while maintaining the sterile field. The boot design reduces pressure under the popliteal fossa and the superficial peroneal nerve. The Yellofin enables safe and easy positioning while providing enhanced surgical site access.

- Boot Design – Fin design helps reduce pressure under the popliteal fossa and superficial peroneal nerve
- Floating Boot – Self-adjusting boot minimizes pressure on the calf, when moving the stirrup
- Lift-Assist – Allows easy movement of the leg when placing it in the desired position
- Yellofin Reusable Pad – Completely encapsulates the foot, ankle, and calf for comfortable and secure positioning
- Squeeze Grip Handle – Provides easy intraoperative adjustment without compromising the sterile field. Simply release the handle to secure the leg holder in all directions
- Lithotomy Range – Yellofin, and Yellofin Elite with Lift-Assist – Set the stirrup in any position between +84° to –33° lithotomy. Yellofin without Lift-Assist – Set the stirrup in any position between +90° to –35° lithotomy
- Abduction Range – Set the stirrup in any position between ±25° to –9° abduction
- Lithotomy & Length Indicators – Visual indicators that help ensure precise positioning

**Ultrafin® Stirrups**

**Easily Accommodates Patients with Larger Calves 800 lbs. (363 kg) Patient Weight Capacity**

The Ultrafin Stirrup is an upgrade of the Yellofin Stirrup. The reinforced rod and joint assembly and the flexible boot make the system capable of positioning a patient weighing up to 800 lbs. (363 kg). Though designed for large patients, the Ultrafin Stirrup is still appropriate for use with the general patient population.

- Patient Weight Capacity: 800 lbs. (363 kg) – Support lithotomy positioning for very large patients
- Flexible Boot – Boot comfortably conforms to the calf shape of the patient while providing support - Fin design helps reduce pressure under the popliteal fossa and superficial peroneal nerve - Flexible boot allows these stirrups to be standardized throughout the facility
- Floating Boot – Self-adjusting boot minimizes pressure on the calf, when moving the stirrup
- Lift-Assist – Allows easy movement of the leg when placing it in the desired position
- Ultrafin Clamshell Pad – Completely encapsulates the foot, ankle, and calf for comfortable and secure positioning for both large and small patients
- Squeeze Grip Handle – Provides easy intraoperative adjustment without compromising the sterile field. Simply release the handle to secure the leg holder in all directions
- Lithotomy Range – Set the stirrup in any position between +84° to –33° lithotomy
- Abduction Range – Set the stirrup in any position between ±25° to –9° abduction
- Lithotomy & Length Indicators – Help ensure precise positioning

**Easy Catcher™ Disposable System**

The Allen® Easy Catcher™ Disposable System attaches to the side rails of any OR table via two integral rail clamps. The system is fully disposable, making it more convenient and quicker to setup. In addition, the Easy Catcher has a removable tube adaptor that enables it to connect to a variety of fluid waste management systems. It is designed to catch and drain fluid during a surgical procedure. It attaches to the side rails of an OR table via two integral rail clamps. The Easy Catcher is a single piece system that contains a fluid drain drape with an integral flexible structure. The support band also flexes to accommodate the doctor’s midsection during procedures.

Allen® Hug-U-Vac® Lateral Positioner
Safe, Comfortable, and Secure Lateral Patient Positioning

The Allen Hug-U-Vac Lateral Positioner safely and comfortably holds patients in lateral and supine positions. The Hug-U-Vac Lateral Positioner’s integral quick-release straps enable it to attach securely to the rails of standard OR tables. The Hug-U-Vac Positioner has a secure valve that eliminates the need for continuous suction.

Ideal for use with:
- Urology Procedures
- Orthopaedic Procedures
- Cardiothoracic Procedures
- Neurological Procedures
- Thoracotomy Procedures
- Plastic Surgery
- General Surgery
- Also can be used for supine positioning in a variety of procedures

Allen Hug-U-Vac® Steep Trend Positioners
A New Standard of Care for Robotic Procedures

The Allen Hug-U-Vac Steep Trend Positioners safely and comfortably holds patients in the steep trendelenburg, reverse trendelenburg and lateral oblique positions. The Hug-U-Vac positioner has integral quick-release straps that enable it to attach tightly to the rails of standard OR tables. The Hug-U-Vac positioner unique pliable design enables it to inflate and deflate evenly, to fit the patient’s body. The Large Hug-U-Vac positioner has been designed with three chambers to accommodate larger patients.

Ideal for use with:
- Gyneocology Procedures
- Urology Procedures
- Nissen Fundoplications
- Colorectal Procedures
- Cholocystectomies
- Robotic Surgical Procedures

Olympic Vac-Pac
A Better, Safer Method of Positioning Patients for Surgery

Vac-Pacs are soft pads which are filled with thousands of tiny plastic beads. The Vac-Pac is molded around the patient, then a suction line is attached. As a vacuum is created inside the Vac-Pac, outside atmospheric pressure forces the beads together and the Vac-Pac becomes firm.

When the suction line is disconnected, the Vac-Pac retains its firm, molded shape to hold the patient securely in position. After surgery, the valve is opened for reuse.

**Easy Lock™ Socket**  
**Quite Possibly the Easiest Accessory Clamp in the World**

No need to look for table notches when attaching the Easy Lock Socket. Attach the clamp anywhere on the OR table rail. Accepts any round post up to 11/16” (1.8cm). Quick and easy pull-to-release lever. Lithotomy wheel for accessory angle adjustments. Patient Weight Capacity: 800 lbs. (363 kg).

Universal Clamp

Single clamp secures accessories with round and rectangular mounting posts from any manufacturer. Accessories can be mounted either vertically or horizontally (e.g. foot extension) with the same clamp. Attach the clamp anywhere on the OR table rail between rail standoffs. Accepts 5/8” (1.6 cm) round and 1” x 1/4” (2.5 cm x 0.6 cm) flat accessories. Not recommended for use with stirrups. Patient Weight Capacity: 350 lbs. (159 kg).

Rail Clamp

Securely locks all accessories with flat mounting blades anywhere along the table side rail. Attaches at OR table rail ends or rail notches. Perfect for tabletop extensions and knee/foot board applications. Strong and light-weight replacement for original rail locks. Accessories can be mounted either vertically or horizontally. Reduces the “free play” associated with standard clamps. Accepts 1” x 1/4” (2.5 cm x 0.6 cm) flat accessories. Patient Weight Capacity: 720 lbs. (327 kg).

Accessory Trolley
This ergonomically designed stand offers a complete storage solution for general operating theatre and QA4 accessories. Adaptable, robust and multi-functional, it is ideal for modern theatre environments and clinical areas.
Specific storage for QA4 accessories with locations for:
- 4 cot sides
- 2 leg sections
- power cable
- 2 transfusion poles
- Provides positions for a large number of general accessories

Item: General Specifications: QA4 Accessory Stand
Frame: Teflon® Coated
Base: Acrylic Capped, Vacuum Formed Base Antibacterial
Casters: 100mm Twin Wheel Polyurethane Tyred Non-Corrosive Castors
Accessory Cart
The Accessory Cart provides convenient storage for most of your surgical table accessories. Six rails and a deep bin afford plenty of storing space. Optional accessory hooks allow quick and easy storage. Weighted base makes cart tip resistant and reduces potential vibration during transport. Polymer base is dent-resistant. Heavy duty casters roll smoothly. Two casters lock for safer and easier loading, unloading, and storage.

Stirrup Cart
A great way to store and protect your investment, this strong and lightweight cart holds and transports your stirrups or legholders. Compact and state-of-the-art, the cart will hold any stirrup from any manufacturer. The sturdy molded fourcaster polymer base is dent-resistant. The deep storage bin is a great place to store clamps and pads securely.

<table>
<thead>
<tr>
<th>Model No.</th>
<th>Item</th>
</tr>
</thead>
<tbody>
<tr>
<td>A-30015</td>
<td>Stirrup Cart</td>
</tr>
</tbody>
</table>

Two different size hooks allow this storage cart to hold a variety of stirrups. Hold up to a 3/4” (1.9 cm) rod on the smaller hook and up to a 1” (2.5 cm) on the larger hook.

Easy Rack
The Easy Rack will provide convenient storage for your stirrups, armboards, clamps, straps and other table accessories. Dent resistant polymer construction is easily cleanable. Specially designed hooks will take all types of stirrups and can be placed onto rack just like they came off the table. No need to readjust to fit on rack. Unique key slots accept 1/4” x 1” (0.6 cm x 2.5 cm) flat and 5/8” (1.6 cm) round mounting posts without the need for clamps. Requires appropriate wall fasteners (not included).

Specify Rail Type
**Serres Suction System**

SERRES Suction Bag System features all necessary options. All of them suitable for serial connection, SERRES Suction Bags are available in capacities of 1000 ml, 2000 ml and 3000 ml. SERRES Suction Bags and other products of the system including accessories are CE-marked and PVC-free.

The aesthetic design of the SERRES Suction Bag System is enhanced by reusable Canisters in transparent or blue. Easy to read due to their wide measuring scale the 2000 ml and 3000 ml canisters are round-shaped and include reusable angle connectors. Oval-shaped Canisters of 1000 ml for smaller needs and a flushing Canister are also available. The Canisters and angle connectors can be washed at 85°C and autoclaved at 121°C.

SERRES Pre-Gelled is designed for demanding clinical suction processes to solidify blood and other body liquids and excretions. The Pre-Gelled is made to facilitate easier and safer handling of liquids.

SERRES Pre-Gelled prevents spillage. The Pre-Gelled Suction Bag includes 25g of powder per litre. Small dissolving Sachets are packed in sizes of 25g. A 2kg bulk version with a measuring scoop is also available.

Stainless Steel Theatre Furniture
Theatre equipment specialist Anetic Aid offer a high range of quality stainless steel furniture. All of the items are designed and produced at their UK manufacturing facility using the latest techniques in engineering.

Instrument Trolleys
All instrument trolleys have fixed down-turned shelves, come complete with stainless steel bright polished frames and use only the recommended gauge 304 stainless steel. All shelves are 2.0mm thick with a 240 silicon grain ultra smooth satin finish. The castors are twin wheel, non-corrosive and ideal for modern clinical areas.

- Frames - Stainless Steel Bright Polished Tube
- Shelves - Stainless Steel Satin Polished Sheet 240 Silicon Grain Ultra Smooth Finish
- Castors 65mm Twin Wheel Polyurethane Tyred non-corrosive Castors

Transfusion Stands

We supply 2 types of Transfusion Stands from Anetic Aid; A lightweight 5 star based version with superb mobility and a cast iron based version with exceptional stability. Both versions incorporate several important features rarely found on other transfusion stands on the market. These include solid stainless steel poles, an easy-to-handle chuck and collet locking mechanism, drainage at the base of the column to prevent fluid build-up and spring damping on the pole. There is a specialist heavy duty Teflon® coated finish on the lightweight base and a unique Acrylic capped antibacterial cover to the heavy base version.

5 Star Base Version
- Base: 5 Star Aluminium Teflon® Coated Finish which is Ultra Clean & Wear Resistant, Ø585mm
- Column and Pole: Bright Polished Stainless Steel
- Height Range: 1470mm - 2440mm
- Castors: 65mm Twin Wheel Polyurethane Tyred Non-Corrosive Castors
- Weight: 5kg

Heavy Cast Base Version
- Base: Cast Iron, Acrylic capped vacuum-formed cover, Antibacterial, Ø570mm
- Column and Pole: Bright Polished Stainless Steel
- Height Range: 1470mm - 2440mm
- Castors: 65mm Twin Wheel Polyurethane Tyred Non-Corrosive Castors
- Weight: 17kg

AET Electronic Tourniquet

The AET Electronic Tourniquet is ideal for use in Theatre, A & E and Pain Relief Clinics. User friendly, easy to clean with low maintenance costs. Independently operated single or dual channel option colour coded and an integral power supply, automatic timers, screen safety lock, audible alarms, patient’s data memory store, it is low maintenance and supplied with a mobile stand and storage facilities.

- State of the art touch screen technology
- Leak compensation facility
- Automatic self test routines
- User friendly and simple to use controls
- Automatic timers
- Screen safety lock
- Audible alarms
- Patient’s data memory store
- Low maintenance
- Supplied with mobile stand and storage facilities

APT Tourniquet

The APT Tourniquet is a dual channel self-compensating tourniquet inflation unit. The separate channels are indicated as A & B and are colour coded blue and black. The colour coding is applied also to the cuff supply hosing to avoid confusion during use. Both channels can be used simultaneously, whilst remaining independently operated. Each channel has two secondary gauges, one for pre-selection of cuff pressure and the other showing actual cuff pressure on inflation. Available with both piped service and ‘E’ size cylinder options.

- Precision controlled quality pressure regulators
- Automatic timers independently activated through inflate/deflate mode
- Twin gauges ensure accurate pressure settings
- Available with both piped service and ‘E’ size air cylinder options

### Tourniquet Cuff Covers
Responding to MDA safety notice MDA SN 1999[26]: we are pleased to offer within our range the new ‘Tourniquet Cuff Covers’. From prepping to completion of the procedure, this product helps prevent solution from reaching the tourniquet from either side, which eliminates skin irritation and allows a clean tourniquet for the next procedure.

**Patient Transfer Board**
Roller-Free Roller Board - better for patients, easier on nurses, and inexpensive.

- No Rollers - Less traumatic transfer for patients
- Comfortable - Soft but sturdy board is easy on patients
- Lightweight - No lifting required, even with your heaviest patients
- No Special Training Requirements - Uses same or similar transfer technique
- Fowler-Position Transfer - Long board allows for transfer in seated position
- Foldable - Long board folds for easy storage and set-up
- Straps - Carry this lightweight device on your shoulder and keep your hands free
- Resilient and Sturdy - More durable than existing boards on the market
- Patient Weight Capacity - 500 lbs. (227 kg)

**No Lifting Required**

Easy Irrigation Tower
“Lift-Assist™” Neutralises Irrigation Bag Weight

Four independently adjustable hooks each safely support up to 10,000cc of fluid. Comfortable, quick release knobs permit vertical adjustment of hangers from 51/2’ to 81/2’. (167.5 cm x 259 cm). This nurse friendly design makes it easy for all personnel to operate effortlessly.

- Stable - our tower doesn’t require sandbags or special weights to stay up
- Nearly Effortless - lift-assist makes vertical adjustment easy
- Simple - spring design
  - NO complicated hydraulics to fail
  - NO battery to remember to charge
- High Capacity - holds up to 40,000cc (10,000cc max capacity per hook)
- User-Friendly - easy-to-reach hangers range from 51/2’ to 81/2’ (1.67 m x 2.59 m)
- Convenient - four independently adjustable hooks
- Ergonomic - comfortable, quick-release knobs

Lift-Assist
Unique spring-loaded elliptical knob unlocks when squeezed and locks securely in place when released. The lift-assist articulation is done mechanically, there are no hydraulics or batteries to fail.

Accuracy
The hanger height is displayed in inches and centimeters for your convenience.

Pre-Op Glove

It is used to safely and effectively remove hairs when shaving patients pre-operatively. No longer will staff need to use expensive surgical tape to remove hairs. Simply insert the hand into the glove, remove the adhesive backing and move the glove around the shaved area to pick up the hairs, then dispose of the glove.

- Simple and Easy to use
- Effective removal of hair
- Eliminates costly use of surgical tape
- Saves time
- Hygienic

Famos F108 Series Rotary Heat Sealer

The F108 series represents the basic models within the Famos rotary heat sealing range, but at the same time these are the most sophisticated models of their kind around the world. Each model has an accurate sealing temperature setting by means of a keyboard which has an LCD display with a good visual read out.

- Completely made of stainless steel
- Conveniently arranged LCD-display and keyboard
- Microprocessor controlled
- In order to increase the convenience of the user even further, a (roller) front table is available as an accessory

Famos F110 Series Rotary Heat Sealer

The second within the Famos rotary heat sealing range is the F110 series, which consists of four models. The F110 series is being used within larger hospitals where many pouches have to be processed continuously.

- Completely made of stainless steel
- Conveniently arranged LCD-display and keyboard
- Microprocessor controlled
- Equipped with Electronic Automatic Start System
- A Return Assistance System
- In order to increase the convenience of the user even further, a (roller) front table is available as an accessory

Famos Accessories
Famos offer the following accessories for its heat sealing equipment:

Roll Holder
Famos produces several stainless steel roll holders that include a self-sharpening cutting device to create the required length of packaging material. Furthermore an extension can be added which doubles the storage capacity of the holder. All roll holders are available as a table model or version that can be attached to the wall or to an upright partition which is fixed to a work table.

</tbody>
</table>

Front Table
Stainless steel roller front tables are available as an accessory to the rotary heat sealers. These tables provide a smooth supporting platform for the packaging material while sealing.

<table>
<thead>
<tr>
<th>Model No.</th>
<th>Item</th>
</tr>
</thead>
<tbody>
<tr>

</tr>
</tbody>
</table>

Roller Front Table
As an accessory for the rotary heat sealers, stainless steel roller front tables are available. These tables provide a heat sealing supporting platform. The rollers guide heavy packaging more easily through the heat sealing machine and prevent the heavy weight from causing bad seals.

BLANCO Mobile Assistants
The first step in the sterile supply and disposal cycle is the use of sterile equipment in the operating theatre, in ambulances, or on the ward. Designed to meet the StU standards, the mobile assistants can be moved to the required location quickly – an essential feature in many situations.

- Robust and hygienic
- Manoeuvrable
- Safe

Mobile StU Supply Tables
Seamless 25 x 25 mm CNS 18/10 square tubular construction, tabletop to support StU standard containers, microlized, 30 mm bevel on all sides, inner edge bevelled downwards 45°, 2 pairs of suspended slide-in rail underneath the tabletop: 1 pair of slide-in rails to hold a container lid, 1 pair of slide-in rails to hold a 1 StU container, 4 double antistatic plastic castors (4 castors Ø 75 mm, 2 of them lockable).

BLANCO CLEANassist
Sterile Supply Solutions

Trulife offers a complete solution for the economical cleaning and sterilisation of instrumentation. All work surfaces are made entirely from stainless steel with a raised profile edge which prevents contaminated water from spilling over. The rear of the work surfaces can also be equipped with a splash back.

Several sizes of sinks are available and these can be supplied according to your particular requirements. All sinks are completely welded and rounded to facilitate cleaning.

We can also supply you with a variety of taps, water spray guns, air guns and plumbing accessories. For below the work surfaces we can offer compartmented cabinets or shelving. We can also fit out storage in the form of drawers. sprayed water.
BLANCO Pre-Cleaning Stations and Sink Units

Hygienic:
The underside of the stainless steel work surface on the BLANCO cleaning tables has a seamless cladding so that moisture is unable to penetrate. The smooth surface is easy to clean. Optional: A raised profile edge that keeps liquids on the tabletop. This prevents contaminated water from spilling onto the floor. The soft rounding of the profile edge prevents a seam where dirt can collect.

Safe:
Personnel in the unclean area of the central sterile equipment supply department are exposed to a greater risk of infections. With the splash guard in the sink area, BLANCO provides reliable protection against infectious sprayed water.

Ergonomic:
Folding doors and drawers are equipped with plastic handle shells in a stainless steel look, bowshaped handles in stainless steel, or recessed handle shells according to your requirements.

User Friendly:
A fully extendable tray to store containers of cleaners and disinfectants makes handling easier.

For more information on CLEANassist pre-cleaning stations and sink units please contact your local Trulife Sales Representative.
BLANCO Packing Tables

Packing tables are available at a standard fixed height of 890mm. There is also the option of electrically operated height adjustable tables. All packing tables can be supplied with uprights to accommodate various storage accessories e.g. wire baskets, plastic boxes, shelves and roll holders with cutters.

Ergonomic:
With height-adjustable tables, the correct working height while sitting or standing can be set at the touch of a button. The height adjustment fully meets workplace safety requirements.

Variable:
Tabletops are available in various materials e.g. stainless steel, corian and formica.

Flexible:
The table upright attachment can be equipped with various StU components.

Bright:
The packing table lighting provides optimal illumination.

Safe:
Meets the requirements of the machinery guidelines.

User Friendly:
Additional storage room is provided, e.g. by base cabinets mounted below the tabletop. Folding doors and drawers are equipped with plastic handle shells in a stainless steel look, bowshaped handles in stainless steel, or recessed handle shells according to your requirements.

Please contact us for specific requests.
BLANCO Transport and Storage Solutions

Transport

The shuttle system is an innovative transport system. It can be used anywhere it is required. Since storage in the shuttle transport trolley or fixed shuttle cabinet is possible, there is no need to manually reload the individual sterile equipment systems at the transfer points. Several 100 kg of sterile equipment are placed into the shuttle slide-in rack once after packing, and brought to and through the autoclave this way. They are then stored in the corresponding storage systems until next use. This eliminates excess handling of wrapped equipment.

High quality:
The fully welded transport trolley, the slide-in rack, and the transfer trolley are seamlessly constructed and especially robust.

Manoeuvrable:
The handle positions on the sides permit better power transmission by the user, so that even a fully loaded transport trolley is easy to manoeuvre.

Practical:
Depending on the required storage duration, storage can take place open on a platform or enclosed in a MEGAprogress functional cabinet.

Changing direction:
The shuttle transport system can be moved in two directions. This makes it compatible with any autoclave.
Storage
Space-saving storage systems are especially in demand. From enclosed storage in transport trolleys, to pass-through cabinets, to open storage on shelving units, Trulife can offer flexible modular storage systems that are especially tailored to individual requirements.

Cabinet systems:
- Made of powder-coated sheet steel or stainless steel
- Double-walled sandwich construction for maximum stability
- Patented hinge mechanism with locking function for clean storage of sterile equipment
- Flexible interior design, e.g. with shelves, support brackets, or heavy-duty pull-outs

Shelving systems:
- Made entirely of stainless steel
- SIU shelves, e.g. with support brackets or pull-outs
- Shelving units with single-walled or double-walled shelf design
- Flexible dimensions for precise adaptation to the respective room
- Height adjustable storage components
- Hygienic construction

For more information on CLEANassist Transport and Storage equipment please contact your local Trulife Sales Representative.
**Multi-Purpose Trolley**

Multi-purpose trolley with 4 insert rails and frame for PC half-module.

- Steel, coated
- Surface: epoxy polyester
- Powder coating light grey RAL 7035
- Open construction
- Perforation spacing 71mm
- Suitable for hook-on insert rails, Number of insert rails variable
- Fits modular baskets in various heights
- 4 swivel castors, Ø100 mm, 2 with brakes
- Optionally available with worktop

Multi-Functional Trolley
The multifunctional trolley provides protected, safe and hygienic storage and easy transport of tools, material, laundry, food and many other items. The trolley is made from anodised aluminium and includes ergonomic sliding handles and integrated sealed doors with central locking. It is smooth running on asymmetrically arranged castors with rubber tyres. A wide variety of equipment and functional accessories make the ZARGES cupboard trolley the solution of choice for internal and external transport and storage problems in hospitals, industry, service companies, government agencies, laundries etc.

- Central locking locks doors in the profile-section frame
- Cylinder lock available as a series of identical or different locks
- Top fender frame with abrasion resistant, disinfectant-proof plastic padding Heat-resistant to 95 °C
- The peripheral door seal is suitable for washdown facilities
- Each end face with an ergonomic handle, of coated cast aluminium
- Also suitable for washdown facilities if suitable running-gear castors are used

Compartment divider
Slide-in unit for trays
Folding base
Trolley underbody
Towing bracket which folds upward & coupling for transport in trolley trains
Central stop with simple operation via connecting pedal
Swivel castors with wheel brake
Heat-resistant to 95 °C
• Anodised aluminium cupboard trolley for wide range of applications
• Profile frame with seal, high noise insulation
• Door leaves 3mm thick, with sturdy, non-rusting individual hinges
• Ergonomic sliding handle made from coated cast aluminium
• Central locking (easy-to-operate lever) locks the doors in the profile section frames
• Two doors can be swung open 270° parallel to the end faces, magnetic catch for open doors
• Trolley underbody: Phosphated and powdered torsional tube
• Easy-running, rubber wheels, “non-marking”, roller bearings, thread guards

W 105 Cupboard Trolley (type III) Plus
Practical transport storage trolley, for fresh laundry, dirty washing, many other items.
• Smooth interior; no undercuts/inaccessible areas in washdown facilities
  (inside dimensions correspond to clearance dimensions)
• Running gear: 2 swivel & 2 fixed castors Ø200mm, 50mm wide

W 105 Cupboard Trolley (type I)
Practical transport storage trolley for fresh laundry, dirty washing, many other items.
• Full profile section frame in the interior; Clearance dimension approx. 60mm less than inside dimension
• Running gear: 2 swivel & 2 fixed castors Ø125mm, 40mm wide
• One DIN A4 label frame on the inside of the right-hand door

W 105 OP Cupboard Trolley (type I)
Aluminium cupboard trolley for transporting sterile fresh-laundry packs, dirty washing.
• Full profile section frame in the interior; Clearance dimension approx. 60mm less than inside dimension
• Running gear: 4 swivel castors, corner mounted, Ø125mm, 40mm wide
• Two foldable additional shelves with burr-free perforations
• Trolley counter-balanced to a standardised weight of 53 +/- 0.2 KG
• One end face with black lettering field and DIN A4 label frame

1. Key Surgical Instrument Cleaning
Made of the highest quality materials, Key Surgical cleaning brushes are designed to keep your surgical instruments and environment spic and span. With a huge assortment of sizes, shapes, bristle types and configurations, there is no cleaning task that we cannot handle.

2. Key Surgical Tags
Being able to clearly identify and track instruments is of the utmost importance. Key Surgical tags are easy to attach, brightly coloured and clearly readable. For specialised needs, custom tags are available.

3. Key Surgical Instrument Protection
Key Surgical instrument caps protect instruments from wear and tear, keeping them newer for longer. Over time, this saves you money by minimising your repair costs. With an abundance of shapes and sizes, we have a cap that is perfect for all your instrument protection needs.
4. Key Surgical Identification Tape
The best way to build instrument sets is with Key Surgical Identification Tape. With over 300 brightly coloured varieties, Key Surgical Identification Tape makes sorting instruments a breeze.

5. Key Surgical Personal Protection
Designed to shield you during sterile processing, Key Surgical offers the absolute best in personal protection. Comfortable face shields, gowns and mitts help to ensure your safety at all times.

6. Key Surgical OR Products
Key Surgical Vascular Booties, Loops and Clamp covers provide unmatched instrument protection and efficient colour-coding that are critical to a smooth running operating room. They are radiopaque and latex free.

Trulife offers an extensive range of Key Surgical products. Please contact your local Trulife sales representative for more information.
X-Ray Aprons

BMS Econoline X-Ray Aprons are high-quality lightweight non-lead and lead aprons with 18 fabric choices included, and are offered at discounted prices. Econoline Aprons are made with the same quality materials as Premium aprons but with limited pay-per-option pricing.

**F111**
Full wrap-around protective apron with 6” wide stretch belt and front buckle closure. Padded shoulders and adjustable lumbar support belt.
- Complete wrap around radiation protection
- Adjustable lumbar support belt
- Front buckle closure
- Distribute weight properly from the shoulders to the hips

**PVK**
Two-piece, wrap-around apron with back support and stretch Velcro® strap closure. Stretch Velcro® straps cross at lower back to provide lumbar support. Relieves weight on shoulders, reduces overall weight on vest without overlap.
- Complete wrap around radiation protection
- Two-piece vest & kilt
- Stretch black lumbar support
- Front Velcro™ closure
VK
Frontal protection apron with criss-cross stretch back and Velcro®. Stretch closure provides greater weight distribution between shoulders and back.
- Complete wrap around radiation protection
- Two-piece vest & kilt
- Front Velcro™ closure

BLANCO Functional Trolleys

Mobile assistants for everyday clinical use. There are extensive trolley configurations available in the MEGAdrive product range which includes a large selection of functional accessories that adds to the style and functionality of the range. We attach great value to the harmony of stylish design and absolute functionality.

The trolleys are sturdy and robust, and are made of high quality materials which meet all current hygienic requirements. Visually, MEGAprogress cabinet systems and the trolleys in the MEGAdrive series match. In order to guarantee optimal handling, we are happy to accommodate individual customer requests when it comes to the design of the trolleys.

Our product programme MEGAdrive includes the following trolleys:

- DIN Bandage and Treatment Trolleys
- ISO module bandage and Treatment Trolleys
- Anaesthesia Trolleys
- Emergency Trolleys
- ICU Trolleys
- Nappy Changing Trolleys
BLANCO MEGAprogress
Room for Even the Most Demanding Requirements
The BLANCO MEGAprogress functional cabinet product line consists of high cabinets, base cabinets, mobile cabinets, wall cabinets, top-mounted cabinets, basins and worktops. Discover the broad range of possibilities in the wide world of MEGAprogress

- Made of powder-coated sheet steel or stainless steel
- Impact and scratch resistant
- Innovative MEGAclick accessory system
- Hygienic, easy-to-clean, disinfectant-resistant
- Energy-saving LED interior lighting
- Electronic lock system for maximum security
- Flexible marking system for better organisation

To discuss your requirements further please contact your local Trulife sales representative.
Modular Room System for OT and Intensive Care Units

Trulife and HT Labor + Hospitaltechnik AG work together with planners, in close partnership with leading hospitals and laboratories to achieve one aim: To develop new solutions and to optimize existing ones in order to help our customers to improve the quality and efficiency of their work.

Design
Made of individual modular panels, with a maximum join width of 8mm. The partition wall system design facilitates the dismantling of any individual panel, to provide easy access or later installations, alterations or repair work.

Surfaces
Stainless Steel, type 304 (18/10), ground with grain size 240.
Stainless Steel, type 304 (18/10), with Powder-coated.

Requirements
(We have an official state certificate of inspection for the following requirements).

Hygiene
Exposed surfaces which might cause hygienic problems are macroscopically smooth and free from pores.

X-Ray Protection
The double panelled wall system has an x-ray protection lead equivalent of 0.6mm at 150 KV). Higher lead equivalents can be achieved by using thicker lead sheeting.

Fire Protection
The wall system is made of a non-flammable A-material. In the case of fire, there is no development of gases that could become a health hazard. The double panelled wall system us in accordance with DIN 4102 part 2, fire resistant class F90A.

Noise Protection
The single panelled wall system (without mineral fibre) has a noise insulation rate of R’w 44 Db. The double panelled wall system (with mineral fibre) has a noise insulation rate of R’w 56 Db.

**Prices**
All orders are subject to acceptance by Trulife. All prices are (unless otherwise stated) exclusive of VAT which will be charged at the rate applicable at the time of invoice, unless a valid VAT exemption certificate (available from Customer Services) accompanies the order. Whilst every effort is made to maintain prices, Trulife reserves the right to increase the prices at any time in accordance with the latest published price lists prior to despatch.

**Payment**
Cheques etc should be made payable to Trulife. Payment is due 30 days from date of invoice. Prepayment is required by non-account customers and private individuals.

**Delivery**
Goods leave our warehouses with a minimum of delay and for orders received by 3.00pm we aim to despatch stock products on the day the order is received if product is in stock. Trulife will do its best to meet delivery dates and quantities, but accepts no liability for the consequences of any delay or non-delivery.

**Claims/Return of Goods**
Any shortage, damage or discrepancy against shipments must be detailed by telephone or in writing together with a copy of the delivery note, to Trulife within 7 days of receipt of goods. All claims for goods lost in transit must be received by Trulife within 7 days of despatch of Trulife’s invoice for such goods. Claims cannot be considered after this time.

Prior to the returning of goods, telephone authorisation must be obtained. Goods must be returned within one calendar month from the date of the delivery note. The delivery note/invoice number must be included on the return advice. The goods must be in their original packaging, in a clean, resaleable condition. Custom products are not returnable. Trulife will not be responsible for return postage and packing unless the goods are faulty or incorrectly supplied.

**Risk Title**
The goods agreed to be sold shall be at the risk of the customer from the time of delivery but the goods shall remain the sole and absolute property of Trulife until such time as the customer shall have paid the agreed price, together with the full price of any goods subject to any other contract with Trulife. Trulife reserves the immediate right of possession of any goods to which it has retained title, and such right shall be exercisable if the customer fails to pay any amount due to Trulife on or before the date on which it falls due or if the customer becomes unable to pay its debts as they fall due. For this purpose the customer grants to Trulife and its agents such access rights as may be required in order to recover possession of the goods. Nothing in this clause will confer any right on the customer to return the goods. Trulife may maintain an action for any amount due to Trulife by the customer notwithstanding that title to the goods may not have vested in the customer.

**Product Improvement Policy**
Trulife reserves the right to change specifications, packaging or withdraw products in the interests of continuing product improvements. E. & O.E.
